OUR MISSION BROUGHT TO LIFE

A B Corp since 2013, New Seasons Market was the first grocery store in the world to receive this designation, which reflects the company's unwavering dedication to social and environmental performance, accountability and transparency.

At New Seasons Market, we nurture a culture that celebrates every individual and cherishes our role in the community.

STAFF REPRESENTATION

We respect our staff's right to choose their representation and recognize our staff's decision to certify with NSLU at 11 of our 21 stores. We're currently negotiating in good faith with NSLU.

To date, we have reached 16 tentative agreements, demonstrating our goal of reaching a contract that reflects our shared dedication to the well-being of our staff, which is in alignment with our progressive values.

At its most recent collective bargaining session, New Seasons Market proposed mediation as a constructive measure to aid in discussions with NSLU. The company believes a neutral, third-party could effectively address differences not resolved through direct negotiations thus far. As of Dec. 3, NSLU has declined the offer.
